

Amendments to the Specification:

Please amend paragraph [0018] of the specification as follows:

[0018] The provisioning request 200 message contains a header section 202 and a body section 204 section. The header section 202 contains a sender section 206, which contains information relating to the sender of the provisioning message, and a time stamp section 208, which contains the time that the message was sent. The sender section 206 may include an identification attribute, which contains a unique identifier for the sender. The sender section 206 may also include a name attribute, which contains a unique name for the sender.
